

Listening to my local KLOVE radio enhances the quality of my life and those around me. The constant positive and encouraging words and songs that surround me from the station challenge me to be a better person. That improves my family relationships, my community relationships, my city, my state, my nation, and my world.

The quality of life is improved by listening to KLOVE too. The news stories they share look for the good and the humorous in each of us and gives me an opportunity to laugh at myself along with laughing with others.

This life is hard at times, there seems to be plenty of putdowns, let downs, and anger, violence, hatred without any reason, but it is seldom that we as a society hear the good, the positive, the "you can make it" -- "you are special" -- "you are unique" -- the "atta boy or atta girl" to where a life is changed. That comes through to us, each of us, as we listen to stations like KLOVE. I am thankful for KLOVE and I am thankful for the FCC and its attempt to impact my life for the positive. around the world.
